

## Main features

4 functions for superior performance

- 1 - Pulse Function adjustable by operator  
For improved washing of any type of object
- 2 - Sweep Function automatic  
For improved uniformity of washing
- 3 - AFR Function automatic  
For guaranteed specific washing for any type of object  
It sets the optimal washing frequency according to object features, to temperature and to liquid.
- 4 - Auto Degas Function automatic  
For setting precisely the power for liquid degasification

AND ALSO:

- - Water wastepipe valve

## Ultrasound washing machines Pulse Industry Series

Pulse 25/50

Pulse 25/50/80/100 Silent

Ultra power

Four very high performance and rugged washing machine models for intensive use.

Washing baskets are built with a special anticavitation steel for long lifespan and superior reliability.

Ideal for medium and large sized objects.

FOR LARGE HIGHLY PRODUCTIVE INDUSTRIES .

PULSE SYSTEM, BEYOND ULTRASONIC WASHING

The "Pulse System" function is a new frontier in ultrasonic washing. It is the most modern method guaranteeing high washing performances at all times, even with objects that are very dirty or have particularly complex shapes.

Pulse system is a sophisticated software that optimises the quality of washing because it allows to adjust ultrasonic energy according to the
