

## TECHNICAL SHEET

# MODEL IDROGET 120

High pressure jet cleaning is essential for goldsmiths and model producers who use the lost wax method for casting small items. The pressurized water is used to remove the plaster from the models after casting quickly and effectively, without the use of damaging acids, which are difficult to dispose of, allowing perfectly environment-friendly operation in full compliance with anti-pollution regulations.

### IDROGET 120

consists of an airtight stainless steel booth with a transparent plexiglass door on top and internal lighting giving a good view of the washing operation.

Plaster removal is controlled by hand with water supplied at 120 bar by the pump.

Standard equipment: rubber gloves

### Main features

- ✓ Effective removal of plaster from models after casting.
- ✓ Water jet adjustable until a pressure of 120 bar.
- ✓ Ecological technology: works without acids, solvents or other substances harmful to the environment.
- ✓ Stainless steel booth with internal lighting.
- ✓ Supplied as standard: washing pump at 120 bar, high pressure hose for connection to the washing booth and supporting trolley.
